---

## SUMMARY

Quality Assurance Engineer with over 3 years of hands-on experience ensuring the quality and reliability of multidisciplinary systems across various platforms. Skilled in writing and executing comprehensive E2E tests, designing test cases optimized for automation, and streamlining testing workflows with custom Postman scripts. Proven track record of mentoring and training junior QA staff, contributing to team growth and product quality.

## EXPERIENCE

### QA Engineer, Bank Hapoalim (through Qualitest, Tesnet) - 2022 – Present

- Trained and mentored new QA team members, establishing onboarding processes and ensuring alignment with project quality standards.
- Designed, wrote, and executed end-to-end (E2E) tests to validate key workflows and business logic, ensuring robust coverage and product reliability.
- Built advanced Postman collections with dynamic scripting to automate API validation — reducing manual API testing time by about 60%.
- Balanced manual testing efforts with ongoing development of API automation using **Rest Assured**, enabling scalable, regression-ready test coverage.
- Leveraged AI-powered tools to generate API test scripts, SQL queries, bug tracking and assist in documentation — boosting QA output and reducing time-to-execution.
- Tested asynchronous data flows and messaging systems involving **Apache Kafka**, ensuring message reliability and correct event propagation.

## EDUCATION

### QUALITY ASSURANCE ENGINEER COURSE, JOHN BRYCE ACADEMY 04/2021

During the course framework, I've cooperated on 3 different projects together with other people. We had to analyze, strategize as well as write test cases and hand in bug reports. The projects were accomplished using testing methodologies and various testing software. Additionally, I've completed an automation project as well as completed the ITCB test with an ISTQB certification.

## SKILLS

- API, Web and Mobile Testing.
- API Automation (Such as RestAssured or SoapUI.)
- Selenium Automation knowledge.
- QC/ALM, Jira with X-ray tools for bug tracking and Management.
- NoSQL (MongoDB)
- Knowledge of SQL queries beyond "Joins" level.
- Gatling Load and Stress testing
- Java and Python coding skills.
- Basic Networking and Virtualization.

## ACTIVITIES

I like to read books, play video games, workout, learn new things and aspire to tinker test and explore about different aspects of systems and software. I'm fluent in 3 languages: Hebrew, English and Russian with some Japanese.
